PROFESSIONAL SUMMARY

Product Manager with 10+ years in B2B SaaS who builds product functions where none exist. At a top-10 global law firm, moved from frontline support into product ownership after spotting workflow gaps others missed, then took the strategy and roadmap for two enterprise platforms serving 25,000+ users across 650+ funds and \$42B+ in closings. Known for ramping fast into complex domains, making the hard prioritization calls, and turning user and usage data into roadmap decisions. Strong analytical foundation across KPIs, A/B testing, SQL, and cross-functional leadership spanning engineering, design, legal operations, and compliance.

KEY SKILLS

Enterprise Product Strategy & Roadmap | Product Discovery & User Research | Backlog Prioritization & Tradeoffs | Cross-Functional Leadership (Eng, Design, Ops, GTM) | Stakeholder & Executive Alignment | KPIs, Metrics & A/B Testing | Data-Driven Decision Making (SQL) | API Integrations & Technical Fluency | Release Management & Go-to-Market | Agile / Scrum

PROFESSIONAL EXPERIENCE

Product Manager

November 2024 - Present

Cooley LLP, San Diego, CA

Own product strategy, roadmap, and end-to-end delivery for two enterprise SaaS platforms at a top-10 global law firm, leading cross-functional teams across engineering, design, and operations.

- **Built the product function from scratch:** Established discovery and handoff processes where none existed, bringing design and business analysis in earlier and cutting revision cycles in half. Adopted firm-wide as the standard framework.
- **Product Strategy & Roadmap:** Defined and communicated the vision and roadmap for Vanilla by Cooley, a platform automating fund subscription, payment, and compliance workflows across 650+ funds, 25,000+ users, and \$42B+ in closings.
- **Data-Driven Prioritization:** Cross-referenced LogRocket session data with Intercom support patterns to pinpoint workflow friction and device issues, improving completion time 25% and cutting support volume 15%.
- **Delivery & Execution:** Ran sprint planning, standups, reviews, and retrospectives across two platforms in Jira and Azure DevOps. Reduced sprint carryover from 35% to 15%.
- **Made the call on integration debt:** As primary technical contact for Stripe and Sanctions.io, audited the initial ETL sync, identified misconfigured rules and recurring exceptions, and drove a self-service resolution UI that removed the data-team dependency and accelerated migration cycles.
- **Executive Stakeholder Management:** Partnered with COOs, CEOs, General Counsel, and board directors on the Cooley D+O compliance platform (~100 public companies, ~1,000 directors), delivering product presentations and status reports to firm leadership.

Product Support Specialist

January 2022 - November 2024

Cooley LLP, San Diego, CA

Owned frontline user engagement across both platforms, building the deep product knowledge and user empathy that earned the move into product ownership.

- **Surfaced the gaps that shaped the roadmap:** Resolved 1,200+ tickets per quarter for 800+ users at 95% satisfaction, identifying friction points and product gaps that directly informed backlog priorities.
- **Enablement & Adoption:** Built a 150+ article knowledge base and led training programs reaching 85% adoption within the first quarter of new releases, reducing onboarding time 67%.
- **SQL & Data Analysis:** Used SQL to surface product gaps from usage patterns, driving data-driven prioritization that reduced support volume 20%.

Senior Customer Success Manager

January 2021 - January 2022

UserVoice (Startup), San Diego, CA

Owned B2B SaaS relationships end-to-end for 80+ accounts (\$1.2M ARR), including Twitter, Zillow, Box, and Clio, partnering with Directors of Product and senior leadership.

- **Retention & Expansion:** Achieved 100% gross retention across the portfolio, reduced at-risk accounts 60%, and identified \$180K in expansion opportunities.
- **Feedback to Roadmap:** Translated customer feedback into product priorities, improving CSAT 18%, and coordinated beta testing for 8+ features that cut post-launch issues 30%.

Customer Success Manager

January 2017 - January 2021

Stack Sports (Startup), San Diego, CA

Owned the post-sale lifecycle across 60+ enterprise accounts on a B2B2C SaaS platform through rapid growth, multiple acquisitions, and a company-wide agile transformation.

- **Revenue Growth:** Grew expansion revenue 15% and improved renewal rate to 91% while owning implementation, onboarding, training, adoption, and upsell.
- **Change Leadership:** Helped drive agile adoption across the organization while navigating multiple acquisitions and maintaining client trust.

Technical Account Manager

January 2015 - January 2017

Affinity Sports (Acquired by Dick's Sporting Goods), San Diego, CA

- **Fast Ramp in Chaos:** Maintained 93% satisfaction across enterprise accounts at a 25-person startup, resolving 500+ issues annually.
- **Self-Service Enablement:** Built documentation and training resources that reduced escalations 28% and enabled client self-service.

TOOLS & TECHNOLOGIES

- Jira | Confluence | Azure DevOps | Figma | Miro | SQL | Google Analytics | Intercom | LogRocket | Stripe | Sanctions.io | REST APIs | Git | VS Code | AI Tools (Copilot, Claude, Cursor, Perplexity)

PROJECTS

LowLift Fitness, Movement Consistency App (Live)

2024 - Present

- *Defined the product around an ignored segment, people who struggle to start, rather than the already-fit, then owned strategy, design, and build end-to-end. Live, built solo with Next.js and Tailwind.*

Unlock Flag Football, Coaching & Scouting Platform (Beta)

2024 - Present

- *Identified a gap created by flag football's 2028 Olympic debut and built the playbook builder, route library, and scouting layer the sport lacked. Founder, PM, and individual contributor. Currently in beta with coaches and athletes.*

Strength & Progress, Inclusive Strength-Training App (Beta)

2024 - Present

- *Built a privacy-first strength-training app for an underserved community the biggest platforms chose not to build for, treating user safety and dignity as the first requirement. Sized the market through user research and TAM/SAM/SOM analysis, authored the PRD, and designed a deterministic safety rules engine (39 unit tests) on an AES-256 architecture with body-affirming progress tracking and adaptive programming. Solo, end-to-end with Next.js and Supabase.*

EDUCATION

Full Stack Software Development, JavaScript & Python
Coding Dojo
