PROFESSIONAL SUMMARY

Product Manager with 2 years of PM experience and 10+ years across B2B and B2B2C SaaS, currently owning strategy, discovery, and delivery for two enterprise platforms (25,000+ users, \$42B+ in closings). Built the PM function from scratch at a top-10 global law firm, defining discovery frameworks, spec standards, and sprint practices where none existed. AI-native working style: uses Claude and ChatGPT for research and discovery, Claude CLI for vibe coding, and Cursor, VS Code, and Antigravity for development, with structured workflows that increase speed without sacrificing quality. Years of frontline customer work built deep product instinct for what to prioritize, what to cut, and when to adapt. Currently shipping three products end-to-end, including a coach/team management app, a consumer fitness app, and a privacy-first mobile platform for an underserved community.

KEY SKILLS

Product Sense & Customer Discovery | AI-Native Workflows (Claude, ChatGPT, Copilot, Perplexity) | Rapid Prototyping & Validation | Agile Delivery & Sprint Management | B2B SaaS & B2B2C Marketplace Growth | SQL & Data-Driven Prioritization | PRDs, Specs & Launch Playbooks | Cross-Functional Ownership | API Integrations (REST, JSON, Auth) | Product Roadmap & Strategy | Python & JavaScript/TypeScript | Stakeholder Alignment

PROFESSIONAL EXPERIENCE

Cooley LLP, San Diego

November 2024 - Present

Product Manager

Own product strategy, discovery, and end-to-end delivery for two enterprise SaaS platforms at a top-10 global law firm. Lead cross-functional teams across engineering, design, and operations. Built the PM function from the ground up, defining how discovery, specs, and delivery work across the org.

- **Discovery & Spec Clarity:** Built discovery and handoff processes where none existed. Decompose high-level initiatives into features and specs with clear goals, scope, edge cases, and non-goals. Brought design and engineering in earlier to resolve ambiguity and reduce risk. Cut revision cycles in half. Adopted firm-wide as standard framework
- **Data-Driven Product Decisions:** Cross-referenced LogRocket session data with Intercom support patterns to pinpoint workflow friction and conversion drop-offs, improving completion time 25% and cutting support volume 15%
- **Agile Delivery & Sprint Ownership:** Run sprint planning, standups, reviews, and retrospectives across multiple teams. Reduced sprint carryover rate from 35% to 15% by improving estimation, scope clarity, and dependency management
- **Product Roadmap & Growth:** Define and communicate product vision and roadmap for Vanilla by Cooley, a platform automating fund subscription workflows across 650+ funds, 25,000+ users, and \$42B+ in closings. Prioritize features based on funnel metrics, partner needs, and business impact
- **Platform & Integration Ownership:** Manage Stripe and Sanctions.io integrations as primary technical contact. Own API readiness including auth, data flow, edge cases, and SLAs. Audited ETL sync, identified misconfigured rules, and drove development of self-service resolution UI that removed data team dependency and accelerated migration cycles

Cooley LLP, San Diego

January 2022 - November 2024

Product Support Specialist

Frontline customer engagement across both enterprise platforms. Built deep understanding of customer needs that directly shaped product strategy and backlog priorities.

- **Customer Evidence & Problem Synthesis:** Resolved 1,200+ tickets/quarter across 800+ users (95% satisfaction). Read every support ticket, watched how users worked, and synthesized friction points and workflow gaps into crisp problem statements that directly shaped what got built and what got cut
- **Enablement & Launch Support:** Built 150+ article knowledge base, launch playbooks, and training programs achieving 85% adoption within first quarter of new releases. Reduced user onboarding time 67%
- **SQL & Data Analysis:** Used SQL to surface product gaps from usage patterns, producing lightweight analyses that drove prioritization decisions and reduced support volume 20%

UserVoice (startup), San Diego

January 2021 - January 2022

Customer Success Manager

Owned B2B SaaS customer relationships end-to-end for 80+ accounts (\$1.2M ARR) including enterprise brands like Twitter, Zillow, Box, and Clio. Partnered with Directors of Product and senior leadership.

- **Customer Insight to Product Priorities:** Turned real customer conversations into business requirements and prioritization recommendations, improving CSAT 18%. Coordinated beta testing for 8+ features, reducing post-launch issues 30%. Developed sharp instinct for what to build, what to cut, and when to adapt based on shifting customer and market needs
- **Retention & Growth:** Achieved 100% gross retention across entire portfolio. Reduced at-risk accounts 60% and identified \$180K in expansion opportunities

Stack Sports (startup), San Diego

January 2017 - January 2021

Customer Success Manager

Owned post-sale customer lifecycle across 60+ enterprise accounts on a B2B2C marketplace platform through rapid growth, multiple acquisitions, and company-wide agile transformation.

- **Marketplace Growth & End-to-End Ownership:** Owned implementation, onboarding, training, adoption, and upsell across a two-sided marketplace. Grew expansion revenue 15% and improved renewal rate to 91%
- **Delivery Through Ambiguity:** Drove agile adoption across the organization while navigating multiple acquisitions, coordinating delivery across teams, and maintaining partner trust through platform transitions. Adapted fast to constantly shifting priorities, timelines, and market conditions

Affinity Sports (acquired by Dick's Sporting Goods), San Diego

January 2015 - January 2017

Technical Account Manager

Owned enterprise accounts at a 25-person startup through acquisition by a national brand.

- **Fast Domain Ramp & Technical Execution:** Maintained 93% satisfaction across enterprise accounts, resolving 500+ technical issues annually while ramping into a completely new domain from day one
- **Documentation & Enablement:** Built documentation, training resources, and enablement materials that reduced escalations 28% and enabled partner self-service

TOOLS & TECHNOLOGIES

- Jira | Azure DevOps | Confluence | Figma | SQL | Google Analytics | LogRocket | Intercom | Stripe | Sanctions.io | REST APIs | Git | VS Code | Cursor | Antigravity | Python | JavaScript/TypeScript | React Native | Next.js | Supabase | AI Tools (Claude, ChatGPT, Copilot, Perplexity)

PROJECTS

LowLift Fitness - Consumer Mobile App (React Native) 2026 - Present

- *Defined product strategy, MVP scope, and validation metrics from scratch. Authored full PRD, feature specs, and comprehensive design system. Designed brand mascot content system using AI video generation for in-app coaching and social media. Building end-to-end with Claude CLI for vibe coding and Cursor for development. Own all product decisions, backlog prioritization, and UX direction independently.*

Unlock Flag Football - Coach & Team Management App (Next.js, Supabase) 2026 - Present

- *Coach and team practice management app for competitive flag football. Built a drill library with interactive setup diagram builder, player roster and benchmarking system (timed and rated assessments), practice planner, and post-practice logging. Five SQL dashboard views surface team strengths, player progression, and practice history. Multi-user from day one with row-level security scoping all data to the team. Built for a 15-player travel team preparing for tournament competition.*

Privacy-First Mobile App for Underserved Community (React Native, Supabase) 2025 - Present

- *Built from zero: user research in a sensitive space, competitive analysis, TAM/SAM/SOM sizing, PRD, and technical architecture. Designed safety rules engine (39 unit tests, Python). AES-256 encryption and privacy-first architecture for users who need a higher standard of care. Managed development in Jira with structured sprints and acceptance criteria.*
